VICTORIA FUSELIER

I'm an aspiring web developer. I've worked in hospitality, medical reception, and the health and fitness industry. I've been coding since 2021, and I'm now looking for work as a junior front-end web developer. I enjoy coding because it allows me to utilize my creativity and problem-solving skills. I also like coding because there's always something new to learn.

EDUCATION

High School Diploma, Valedictorian
Lake Arthur High School

Bachelor's Degree in Kinesiology
Louisiana State University

Front-End Web Development Track
FreeCodeCamp

Front-End Web Development Track
Team Treehouse

Front-End Web Development Techdegree
Team Treehouse

Design
Web Design, Responsive Design

JavaScript
DOM Selectors, DOM Manipulation, DOM Traversal, Callback Functions, Array Methods, Array Iteration Methods, Object-Oriented JavaScript, Object Interactions, Fetch API, JQuery (and more!)

WORK

Personal Profile
Practicing my HTML and CSS skills, I built a personal profile page.
https://victoriafuselier.github.io/personal-profile-page/

Responsive Layout
Based off of mockup images, I created a site with a mobile-first responsive layout.
https://victoriafuselier.github.io/mobile-first-responsive-layout/

Registration Form
Building on my HTML, CSS, and responsive layout skills, I built an online registration form.
https://victoriafuselier.github.io/online-registration-form/

Web Style Guide
I built a useful Sass micro-framework that I can use to quickly prototype other websites.
https://victoriafuselier.github.io/web-style-guide/

Photo Gallery
I created an interactive photo gallery to match a mockup image using JavaScript and CSS grid layout.
https://victoriafuselier.github.io/interactive-photo-gallery/

Game Show App
I improved my JavaScript skills building a browser version "Wheel of Fortune" type of word-guessing game.
https://victoriafuselier.github.io/game-show-app/

Web App Dashboard
I used a mockup and SVG images to build a web dashboard with JavaScript-driven charts and graphs.
https://victoriafuselier.github.io/web-app-dashboard/

Employee Directory
I used an API to create an employee directory for a fictional startup company.
https://victoriafuselier.github.io/employee-directory/

Off the Hook Creations
I made a website for a small business start-up to reach more customers.
